Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

Problem - Solution Fit Canvas | Implement Client Script and UI Policy

1. CUSTOMER SEGMENT(S) (CS) ServiceNow users, service desk agents, IT support teams, and administrators who complete or manage service forms.	6. CUSTOMER CONSTRAINTS (CC) Limited knowledge of form rules, inconsistent manual validation, time pressure, and risk of incomplete or incorrect field entries.	5. AVAILABLE SOLUTIONS (AS) Manual checking, help text, training, mandatory-field settings, and basic form configuration. These may not cover dynamic conditions.
2. JOBS-TO-BE-DONE / PROBLEMS (J&P) Make forms respond to user actions: show or hide fields, set fields mandatory or read-only, and validate entries before submission.	9. PROBLEM ROOT CAUSE (RC) Static or inconsistent form behaviour can leave users unaware of required information and allow invalid or unnecessary inputs.	7. BEHAVIOUR (BE) Users enter information, change selections, move between fields, and submit forms. They need immediate guidance when conditions change.
3. TRIGGERS (TR) A field value changes, a form loads, a user attempts to submit, or a business condition requires a different form state.	10. YOUR SOLUTION (SL) Implement ServiceNow Client Scripts and UI Policies for onLoad, onChange and onSubmit actions, dynamic visibility, mandatory fields, read-only controls and validation.	8. CHANNELS of BEHAVIOUR (CH) 8.1 ONLINE: ServiceNow forms, web portal and internal service applications. 8.2 OFFLINE: User training, process guidelines and support-team assistance.
4. EMOTIONS: BEFORE / AFTER (EM) Before: confusion, repeated corrections, and uncertainty. After: clearer forms, faster completion, fewer input errors, and more confidence in the process.
